

I.T. and Me Works

**A Follow up Course of Study to
I.T. and Me with Complete Lesson Plans
For Eighth or Ninth Grade Students**

Section 2:

“Multimedia”

The focus of this strand is to help students master a variety of computer-based applications that integrate text, graphics, sound, animation and video. With the Internet and eCommerce growing at expanding rates, the demand for multimedia-trained specialists far exceeds the supply. Growing fields in multimedia range from video game creators, to website designers, to 3-D animation specialists.

Development of this course was made possible through the use of funds under the Carl D. Perkins Vocational and Technology Act of 1998 and provided by the NH Department of Education.
